

ERRATA

ACSi 2007, 54, 325-335, and 2007, 54, 868-881

In two papers published in the previous issues of Acta Chimica Slovenica, written by Leokadia Strzemecka in *Acta Chim. Slov.* 2007, 54, 325-335, and 2007, 54, 868-881, the correct name of studied compounds in the title and throughout the text should be: *N*-allyl-5-(pyridin-2-yl)-1,3,4-thiadiazol-2-amine for compound **1**, and *N*-cinnamyl-5-(pyridin-2-yl)-1,3,4-thiadiazol-2-amine for compound **2** (see Figure 1).

Figure 1

N-allyl-5-(pyridin-2-yl)-1,3,4-thiadiazol-2-amine (**1**)

N-cinnamyl-5-(pyridin-2-yl)-1,3,4-thiadiazol-2-amine (**2**)

In all Figures where the tautomeric and resonance structure of compounds **1** and **2** with one electron (radical) appears, the biradical structure should be read (see Figure 2 for example), and single arrow (\rightarrow) linking different tautomeric structures should be replaced with two reverse arrows (\rightleftharpoons).

Figure 2

biradical of *N*-allyl-5-(pyridin-2-yl)-1,3,4-thiadiazol-2-amine (**1**)

Corrections of type indicated in Figure 3 (see Figure 6 in *Acta Chim. Slov.* 2007, 54, 868-88, for example) and of similar types should be carried out in all other schemes as well.

Figure 3

2-methylpyridyl radical
